Future plans

- We think the best idea for RO-14-ITIM is to invest in **processing power**
- If financial support may exist, in the future we would upgrade the hardware infrastructure too, enlarging the datacenter and upgrading the UPS support which now is hardly holding the functionality of the datacenter for 10 minutes

Further upgrades would be:

- **Urgent upgrade** as the next phase will be - upgrade of software to UMD₃ or UMD₄, we are planning on studying these solution in the future
- Another upgrade that we would like to improve will be the investments in the cooling system of the datacenter
